DRIVING SUPERIOR LAMINATION

HEAVY DUTY
WINDING UNIT

MAKES HANDLING LARGE, HEAVY ROLLS EASY

The Crest Heavy Duty Winder winds and unwinds foils, films and textiles onto large rolls of up to 500 kg and ø 1200 mm. Its robust frame of welded steel beams moves on mounted wheels and stands firm on ground-anchorable machine feet. Safety chucks with manual side shift position the roll precisely, while a motor controls the winding force. A diameter sensor with feedback regulates the motor for consistent tension and optimal performance.

FEATURES

- Designed for efficient winding and unwinding of various materials on large rolls
- Stable metal frame with integrated machine feet and swivel wheels, ensuring both stability and mobility
- Safety chucks with manual side shift for accurate positioning
- Pneumatically operated clamping shafts, designed for high torques and heavy weights
- Diameter sensor with feedback for automatic control of unwinding speed and material tension
- Bi-directional functionality

SPECIFICATIONS

- Handles rolls up to 500 kg
- Processes materials with widths up to 3200 mm*
- Suitable for roll diameters up to ø 1200 mm
- Process speeds up to 25 m/min
- Designed as standard for materials on 3” cores

Other sizes can be supplied on request

*Also available in a standard working width of 1600 mm; other widths on request.

This machine can be customized
