DRIVING SUPERIOR LAMINATION

RDC-175/500
ROTARY DIE CUTTER

CONVENIENTLY MODULAR

The Crest Rotary Die Cutter is a modular roll-to-roll machine for winding, laminating and cutting. It handles full cuts, kiss cuts, guillotine cuts, punching, scoring and slitting of plastic, paper, foam, rubber, film and adhesives, for products such as labels, gaskets and medical parts. Two models are available: Model 1 holds up to 11 processing units, Model 2 up to 17. All units are modular and easy to swap, so the machine is quickly configured for new products and production needs.

OPTIONAL FEATURES

- Wind & unwind unit
- Laminating unit
- Sheet stacker
- Die cut
- Slitting
- Cross cutting
- Register unit
- Custom units
- Web control

TECHNICAL SPECIFICATIONS

- Available models: 11 or 17 interchangeable units
- Optional: Servo driven (die cutting) units
- Digital length counter with programmable stop
- Available widths: 175 mm, 250 mm, 350 mm, 500 mm
- Production capacity: 70 m/min, optional up to 100 m/min
- Machine weight: ± 1500 kg

KEY FEATURES

- Modular system with interchangeable units
- Units can be placed on every desired position
- Central driven units by timing belt
- Control panel on sliding rail
- Simple operation
- Open machine construction for easy setup
- This machine can be customized
