

DRIVING SUPERIOR LAMINATION

SOLID AND EASY TO USE

The CRL-300 has been especially designed to transport, load and unload heavy rolls. Special attention has been given to health and safety aspects. One person is able to move around and load or unload heavy rolls efficiently and without the risk of injury. The CRL-300 has a low frame design and takes rolls from storage and transport them to equipment loading stations. The handwinch is equipped with an automatic brake mechanism and operates easily without excessive physical force.
