

DRIVING SUPERIOR LAMINATION

GLASS PANEL LAMINATOR

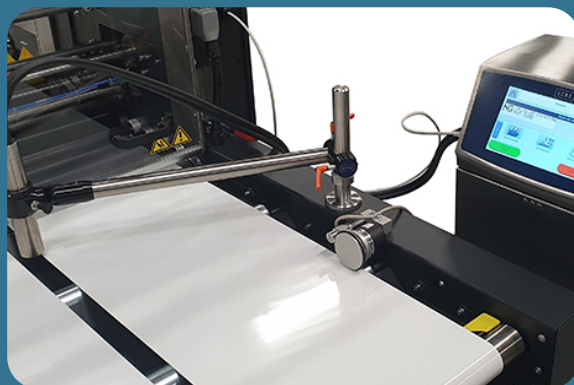

The Crest Glass Panel Laminator is expertly designed to apply protective foil to either side of glass panels, offering a versatile and ideal solution for touch screens, dashboard displays, small glass sheets, mirrors, and more.

FEATURES

- Able to laminate a protective film on both the upper and/or the lower side of the glass panels;
- The glass can be entered by hand, conveyed from a cleaning machine or placed by a robot;
- It is specifically designed to handle glass with care and apply the protection foil with ultimate precision;
- It can be equipped with a printer for indication marks, serial numbers, production checks, etc.

PANEL PROTECTION HIGH QUALITY LAMINATION

generic, multifunctional, and reliable!

The machine features rubberized laminating rollers, engineered for efficient film application on glass plates. The Crest Glass Panel Laminator comes equipped with dual conveyors for precise glass plate positioning and seamless collection post-processing.
