

DRIVING SUPERIOR LAMINATION

NON STOP LAMINATION PRODUCTION

The Crest Laminator Fly Cutter has been specifically developed to laminate various sorts of sheets, single or double-sided, hot or cold. Ingeniously engineered to separate laminated sheets automatically, the fly cutting system ensures a non-stop production process, especially suitable for polyurethane foam, or even wood.

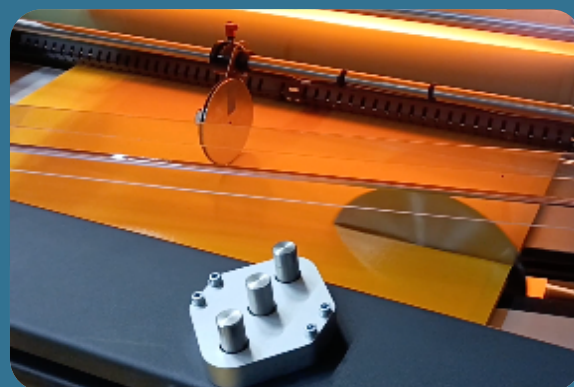

SOME OPTIONAL FEATURES

- Automatic sheet feeder
- Automatic pick & place unit
- External infrared heating for hotmelt applications

TECHNICAL SPECIFICATIONS

- | | |
|---------------------------------------|--------------|
| • Max. laminating / cutting with | 1700mm |
| • Max. laminating / cutting thickness | 120mm |
| • Max. laminating speed | ± 25 mtr/min |
| • Max. roller temperature | 150°C |
| • Machine weight | ± 2050kg |

LFC-1700 LAMINATOR FLY CUTTER

YOUR BENEFITS

- High quality single or double sided lamination;
- Accurate on the fly cutting system;
- Sheet to sheet and roll to sheet processing;
- High speed processing;
- Always cut to the correct position / length;
- Smart PLC system & HMI touch screen;
- Low-resistance driven roller tables.
